The article states that a “spokesman for CMP noted that there were six days of public hearings held last spring by the Maine Land Use Planning Commission, the Department of Environmental Protection and the Army Corps, at which interested parties and the public were able to comment and share their views.” This is not completely accurate. The referenced hearings were state hearings that the Corps attended to answer any questions from the public concerning the Corps permitting process, etc., but it was not a Corps hearing.

Mike

Rep. Golden requests hearing on  
CMP power line so residents can  
have their say

Maine's 2nd District representative is asking the Army Corps of Engineers to open up its process to public input.
